## **Parent Leadership Opportunity!**

The Burrillville Public School district is committed to parent leadership and providing the resources to increase involvement on the part of parents of students with disabilities. With that said, we are partnering with RI Parent Information Network (RIPIN) in providing technical assistance to foster parents as leaders within our district. The technical assistance will consist of **providing training for parents of students with disabilities to become leaders**, specifically as it relates to the roles and responsibilities of our Local Advisory Committee on Special Education – the Burrillville Special Education Advisory Committee (BSEAC).

**The targeted audience for this training is parents of school age students with disabilities, who might have an interest in this intensive 15 hour training *taking place this fall 2016* at RI Parent Information Network in Cranston.**

We're looking for parents who can answer "yes" to the following questions:

- Am I able to set aside the needs of my own child and look at the "big picture" in my district?*
- Do I have strengths or skills that would be valuable to this committee?*
- Can I commit the necessary time?*
- Am I able to help lead a group that advises and provides guidance to my district in helping children with disabilities?*
- Could my participation make a difference for children with disabilities and their families in creating a collaborative school environment in my district?*

If this sounds like an interesting opportunity, please contact Kim Pristawa, Interim Director of Pupil Personnel Services, at 401-568-1301, ext. 3.
