

## **POLICY RELATED TO SUPPORT OPERATIONS**

### **FOOD SAFETY**

The Burrillville School Committee recognizes the need to prevent food borne illness in all school settings where food can become contaminated.

These settings may include the cafeteria, the classroom, and school-sponsored events or field trips where foods are prepared or served. Foods include those brought from home as well as foods prepared and served in school.

The Burrillville School Department shall develop and promote guidelines that apply to the actions of school staff with a goal of reducing behaviors that could threaten food safety and/or risk the health of students and school personnel.
